

IN THE SPECIFICATION

Please replace the paragraph beginning at page 10, line 1 with the following paragraph:

the invention;

-fig. 6 shows a detail of fig. 5 on an enlarged scale; and

-fig. 7 shows a portion of a lenticular element having micro-lenses with different shapes.

Please amend the paragraph beginning at page 13, line 24 as follows:

According to the use and aesthetic effect to be obtained, the lenses 22 can be substantially of any shape, for example circular (fig. 3), hexagonal (fig. 4), square (fig. 5), or any other shape, or differentiated according to the zones of the optical element, or even lens by lens, as in (fig. 7), which shows two micro-lenses 22a, 22b having different shapes, provided that they are suitable to be positioned in a desired manner in correspondence with the crossing points 19, or pixels, advantageously with a desired shift "d", corresponding to the individual light sources.
